

build great products™

Leverage your collective genius.

How do you innovate like a start-up when you're a global enterprise?

Product development is a tough process for large organizations to manage. Change happens. Communication breaks down. Schedules slip. Sound familiar?

Imagine if you could tap into the collective genius of everyone that holds a stake in the success of your products. From your CEO to your customers, from product managers to engineers, now everyone is aligned and participating in the process. There's clarity on what customers want. The requirements are visible to everyone. The team is responding to change and executing flawlessly. This new way of working isn't a pipe dream. It's your development process powered by Jama.

➤ **Welcome to Contour**, the collaborative way to build great products.

At Jama, we work with the world's most innovative companies and government agencies to take control of scope and manage requirements smoothly through the entire development process. Jama Contour, our enterprise Web application, is the industry standard for collaborative requirements management. With Contour, your team can easily:

- **Create a central hub of requirements**
- **Foster real-time collaboration**
- **Gain consensus with everyone quickly**
- **Ensure coverage and traceability**
- **Manage change without disruption**
- **Customize Contour to fit your process**
- **Seamlessly integrate Contour with other development tools you use**

Experience the Jama difference, try Contour free with your team.

By using Contour instead of documents or traditional requirements management tools, Jama customers achieve immediate results.

6x faster development

2x improved quality

25% reduced R&D costs

The experts say...

"The smartest companies will use emerging technology to tap the power of collective intelligence."

– Thomas W. Malone, MIT Sloan

"The ever-growing global dispersion of development teams is powering the need for improved team collaboration."

– Tom Grant, Ph.D., Senior Analyst, Forrester Research

"The first key to project success is collaborative requirements definition and management."

– Matt Light, VP Gartner

"The secret to designing products customers love is managing requirements effectively."

– Michelle Boucher, Product Innovation, Aberdeen

Jama customers say...

"Contour establishes a new level of accountability that never existed."

– Kim DeLeon, Booz Allen Hamilton

"Using Contour, we have hundreds of remote users working together, and we're improving quality 10x."

– Kenton Hensley, Cornell University

"Contour gives us unprecedented insight in our development process."

– Quentin Vandermerwe, Bycast

"We could never work this fluidly with Word documents alone. Contour is critical to the success of our projects."

– Tim Hollosy, Kunz, Leigh & Associates

"We achieved a 42:1 ROI in the first six months using Contour."

– Rob Sloat, Aristocrat Technologies
