# Is a Poor Review Process Slowing Your Product Development?

Outdated Review Processes Stifle Collaboration

A document-based approach to reviews often results in team misalignment, and leads to long review cycles, versioning issues, and an abundance of unnecessary meetings. Without an efficient way to review and approve requirements, teams often face rework, missed deadlines, product design failures, or even expensive recalls.

45%

of product launches are delayed by at least one month.

Gartner

ALMOST

1/3

of teams either have no requirements management system in place, and rely on informal forms of collaboration and reviews with email, shared spreadsheets, etc.

GENECA SURVEY

78%

of respondents said that they'd like business stakeholders to be more responsive and engaged in the project.

Rework is a big cause of project failure and a significant source of delays.

80%

of respondents said that they spend half their time on rework.

Jama Connect Review Center Simplifies the Review Process

Review Center streamlines reviews and facilitates collaboration, giving stakeholders easy access to provide their feedback where required. Teams with an efficient process for reviewing and approving requirements see faster review cycles and reduced rework, and can ensure quality and compliance.

80%

of planning time saved that previously would have been wasted on meetings, sorting through versioned documents and emails, and consolidating feedback in review cycle.

MediSync

" Review Center is my favorite feature. All the comments are right there, and there's an integrated 'show changes' feature so I can see exactly how my feedback was incorporated."
