jama **connect**™ for **Automotive**

Accelerate innovation and simplify functional safety compliance
and cybersecurity in automotive development

Jama Connect for Automotive provides a single platform for development teams to manage requirements, test, and risk throughout the product development cycle. The license model is fully scalable, ensuring rapid deployment and easy adoption of the solution across your product development team. The base product includes the full breadth of Jama Connect's core capabilities with access for up to 10 named Creators, and site licenses for Stakeholders and Reviewers — enough to get your product organization up and running with our industry-leading solution.

Additionally, the solution is designed for automotive developers and includes standard frameworks aligned to key industry standards of ISO 26262, ISO 21434, and Automotive SPICE (ASPICE); procedure and configuration guides; export templates; a functional safety kit; and training and consulting designed for automotive product development.

Updates to these features are included as part of the subscription package.

The application of the base product can easily be expanded to allow access for the entire enterprise. Jama Connect for Automotive is available as either a cloud or self-hosted deployment option and is based on an annual subscription. It does not require client-side software to be installed.

Includes:

- Minimum of 10 Named Creators

- Unlimited number of licenses for Stakeholders and Reviewers

- Secure SaaS hosting and on-premises deployment options

- 24 x 7 critical issue support

- Non-production-hosted sandbox

- Standard automotive framework aligned to key industry standards: ISO 26262:2018, ISO 21434:2021, and Automotive SPICE (ASPICE)

- Procedure and configuration guides for automotive developers

- Export templates

- Functional Safety Kit for Jama Connect

- Training and consulting designed for automotive manufacturing

The following report/export templates are provided as part of the solution to support alignment to automotive industry standards and regulations.

Report / Export Templates Included:

TEMPLATE NAME	WHEN TO USE
Export to Word Default	Quick exports to Word where content is more important than formatting
Export to Word - Advanced	Export well formatted specification documents to Word
Export to Word - Simplified	Export well formatted specification documents to Word without custom fields or relationships
Export to Excel – HARA	Export HARA tables to Excel including Safety Goals
Export to Word - Checklists	Export Checklists to Word
Set Review Summary	Analyze project items for review completeness, results summarized for each Set
Traceability Analysis	Analyze project items for traceability completeness, results summarized for each item type
Requirements Allocation	Export a table in Excel showing the system elements allocated to each system requirement
Requirements V&V Matrix	Export a table in Excel showing the verification or validation method assigned to each requirement

Because everyone requires clarity on what your teams are building and why, Jama Connect for Automotive offers four unique license types to suit different user needs and promote deep collaboration and alignment across your organization. The table below summarizes these available license types.

The solution allows flexibility to customize the configuration of your Creator licenses, for example:
- **10 named Creator licenses (or an equivalent mix of named and floating Creators)**
- **Note: 4 named Creator licenses can be exchanged for 1 floating Creator license. For example, instead of 10 named Creator licenses you can have 1 floating and 6 named Creator licenses.**

	CAPABILITIES	User License			Additional License
		CREATOR	STAKEHOLDER	REVIEWER	TEST RUNNER
WRITE	Create projects	●			
	Add and manage requirements	●			
	Create reports and dashboards	●			
	Initiate reviews	●			
	Create test cases	●			
	Write / edit test plans	●			●
	Execute test runs and log defects	●			●
READ / COMMENT	Read access	●	●		●
	View reports and dashboards	●	●		●
	Comment within project	●	●		●
	View activity stream	●	●		●
	Participate in collaboration stream	●	●		●
REVIEW	Participate in reviews	●	●	●	●
	Provide feedback and changes	●	●	●	●
	Add electronic signature	●	●	●	●
	Reply to collaboration stream	●	●	●	●
