

Tricentis qTest Integration with jama connect®

Together, Tricentis and Jama Software are empowering customers to develop complex products reliably with accelerated launch cycles.

Integration Overview

Product development organizations have to move fast without sacrificing quality to remain competitive in today's market. In addition, these companies must adhere to strict industry standards to meet the ever-increasing compliance and safety regulations.

Together, Jama Software and Tricentis provide a comprehensive solution that brings business and development teams together to efficiently scale agile practices and manage the complexity of product development with streamlined test management.

Scale agile practices to accelerate the launch of new products to market

Tricentis qTest is a modern testing platform that seamlessly integrates testing into agile workflows. Jama Connect™ is an integrated solution for guiding the strategic and operational aspects of complex product development. When combined, this joint solution brings product development and quality teams together to scale complex development practices and accelerate market launch cycles.

TRICENTIS QTEST + JAMA CONNECT® GIVES YOU MORE

Access to QA plans and defects in real-time

The linked Tricentis-Jama toolset supports workflow automation between requirements and test systems. This provides visibility into test results and the quality of development projects. The QA team has a complete view into business goals and requirements.

The product development team has visibility into quality parameters and test results, in real-time.

Organization-wide Visibility

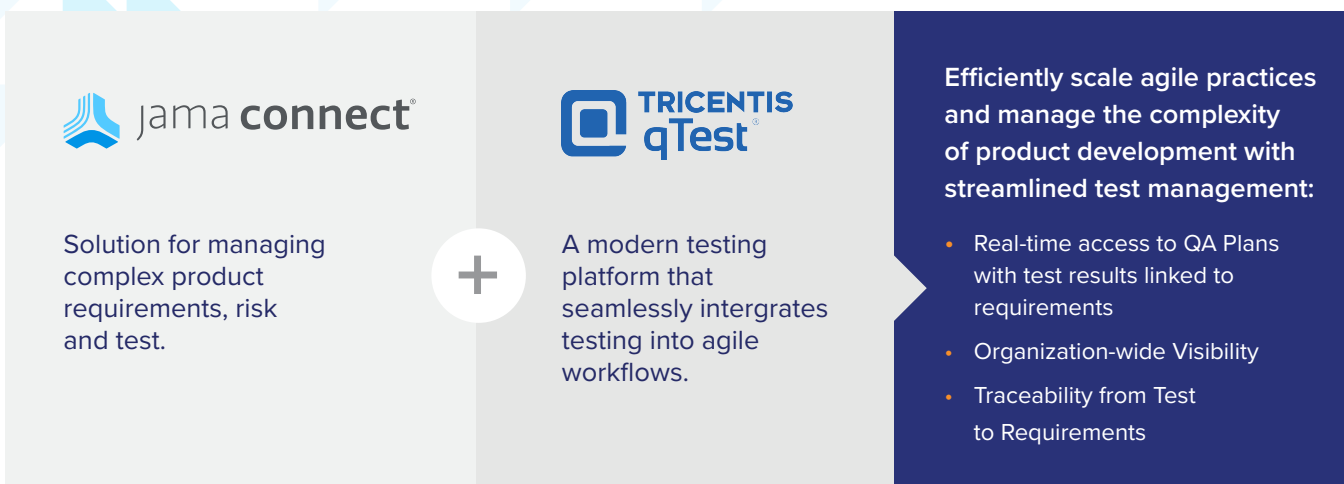

Every stakeholder works with the same data, creating a single source of the truth. This provides real-time visibility into the current status of every development project.

Traceability from Test to Requirements

By connecting requirements with test results, the solution gives you an easy way to ensure all requirements are verified and validated to achieve complete traceability.

How Tricentis qTest is integrated to Jama Connect®

Tricentis and Jama Software have formed a strategic partnership to help development teams increase their level of collaboration and improve efficiency and quality across product development teams. This integrated solution provides a powerful toolset that links the key activities of product development together with a focus on test plans, quality and reliability assessment, automated test strategy, and linking test results to requirements.

Benefits of the Integration

Jama Connect Users	qTest Users
Complete traceability for requirements throughout the Jama Connect and Tricentis qTest tool chain.	Access to business requirements within qTest and real-time updates for enhancements.
Clear visibility into quality parameters and test results in real-time.	Complete context of the customer requirements and priorities with every stakeholder working from the same data.
No manual efforts required to keep QA teams informed of updates in customer priorities or requirements changes.	No manual effort required to keep project management teams updated on test results and test plans.

Jama Software® is focused on maximizing innovation success in multidisciplinary engineering organizations. Numerous firsts for humanity in fields such as fuel cells, electrification, space, software-defined vehicles, surgical robotics, and more all rely on Jama Connect® requirements management software to minimize the risk of defects, rework, cost overruns, and recalls. Using Jama Connect, engineering organizations can now intelligently manage the development process by leveraging Live Traceability™ across best-of-breed tools to measurably improve outcomes. Our rapidly growing customer base spans the automotive, medical device, life sciences, semiconductor, aerospace & defense, industrial manufacturing, consumer electronics, financial services, and insurance industries.
